Profile Summary

Software Engineer with 2.5+ years of experience in enterprise application development using the Unqork platform. Experienced in building workflow-based applications, integrating external services, configuring schemas, developing UI components, and implementing business logic. Hands-on experience with Unqork, Eigen integration, JavaScript, REST APIs, and delivering insurance domain solutions across Property Insurance and Life Insurance platforms.

Experience

Project 1: Allianz Submission Hub Platform — DEC 2023 – DEC 2025

Domain: Property Insurance

Technologies: Unqork, Eigen, JavaScript, REST APIs

• Developed and enhanced a property insurance submission hub application using the Unqork platform.

• Integrated Eigen document extraction services with Unqork to retrieve extracted document data and display it within the application workflow.

• Worked on data flow between document extraction services and Unqork application components.

• Developed an intelligent PDF viewer to display extracted entity data alongside original documents with interactive highlights, configured schemas, data validations, and mapped extracted document fields to UI components.

• Implemented document rendering, download processing, and print functionalities using PDF.js.

• Developed logic for navigating users to extracted information within documents using highlight coordinates.

Project 2: Accenture Life Insurance Platform [ALIP] Portal Application — DEC 2025 – JULY 2026

Domain: Life Insurance

Technologies: Unqork, REST APIs

• Developed a role-based ALIP portal application supporting Adviser, Investor, and Staff dashboards.

• Developed life insurance application workflows where advisers initiate applications and investors review, approve, or reject requests.

• Worked on application lifecycle processes including quote creation, saved applications, submitted applications, and status tracking.

• Configured forms, validations, workflows, business rules, and role-based application flows.

• Worked on client management features including personal details, beneficiary details, financial information, and account updates.

• Developed UI components, configured data models, and managed schema structures using Unqork.

• Supported API integrations, debugging, testing, and application enhancements.

Project 3: CVS Healthcare Application — JULY 2026 - Present

Project Overview:

Worked on the CVS Healthcare project, which comprises multiple applications, including Fall Out Hub, Bundles Hub, CDV, CRD, CM Auth, and SCM.

Roles and Responsibilities:

- Developed and enhanced applications using the Unqork low-code platform.
- Worked on the CM Auth application, implementing authorization workflows, API integrations, JSON data transformations, and add, edit, search, and notes functionalities.
- Contributed to the SCM application, supporting development and enhancements through successful go live.
- Implemented business logic, data filtering, and UI enhancements based on business requirements.

Education

Koneru Lakshmaiah University, Guntur **Sep 2021 – July 2023**
